SPSS AppStream - Psychology Fall 2022

This is an old page, replaced by:

PSY Spring 2023 AppStream Instructions

**These directions are for the use of SPSS via a web browser
(instead of installing it on your own computer)
for various Fall 2022 courses of the URI Psychology department.**

Get Help

- Contact your instructor for help with course/lab directions
- If the issue is a technical one, you can contact Chi Shen cshen@uri.edu

Access SPSS

1. **Go to https://myapps.microsoft.com**

2. Look for two items:
   - **SPSS AppStream (Instant)** -- **Quick session start, use only during scheduled labs.** Outside of your scheduled lab times this will not be available, or available, but reserved for students in other labs.

SPSS AppStream
(Instant)

- SPSS AppStream -- 2-3 minute wait for start, available at all times.

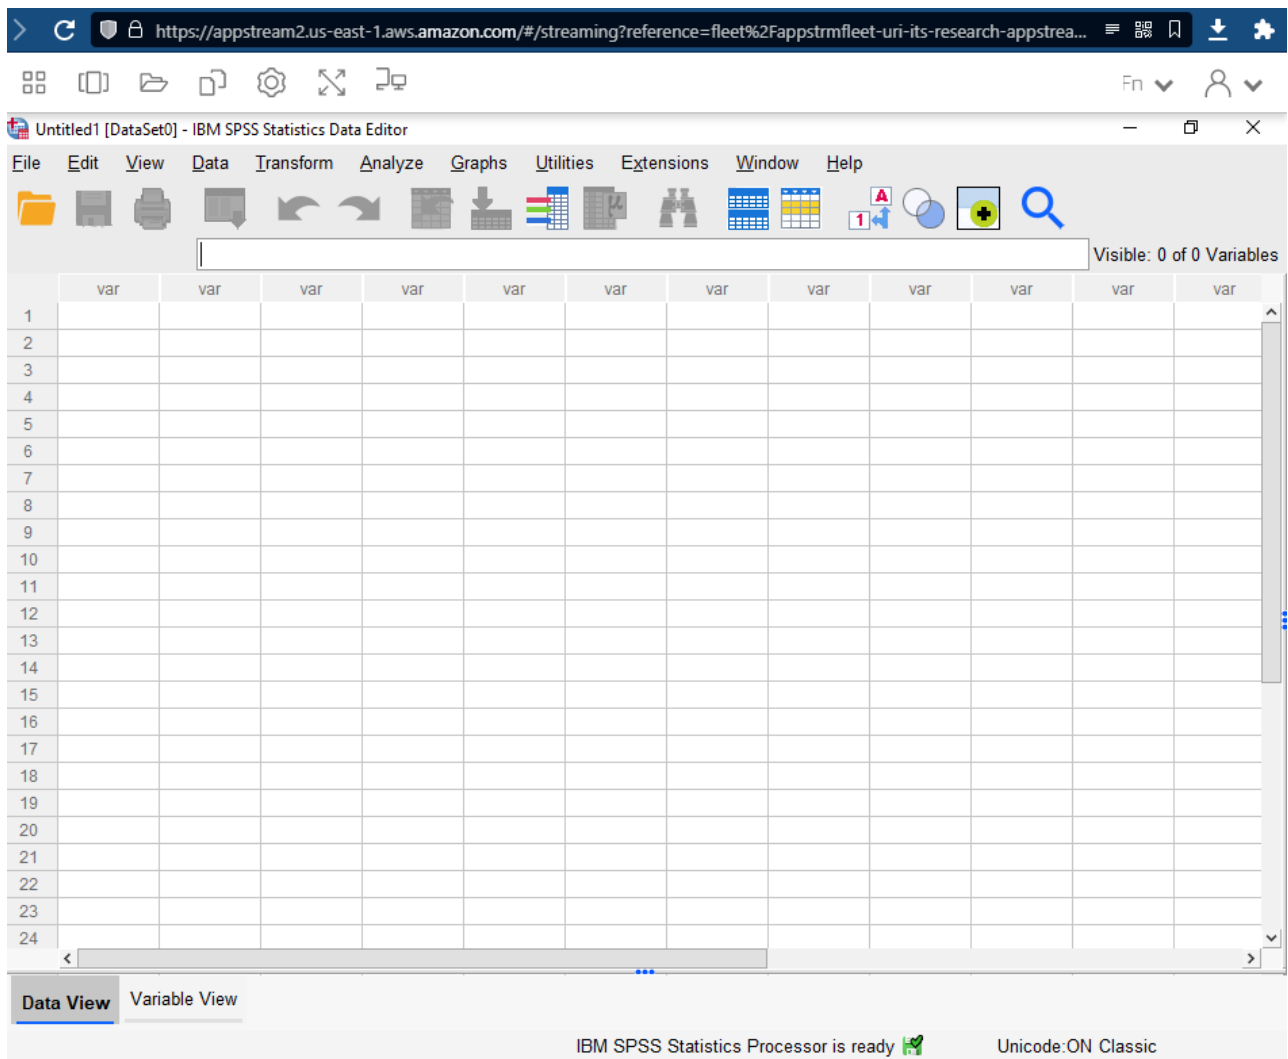

SPSS AppStream

3. Click the SPSS icon:

Google Chrome   SPSS Statistics   Windows Explorer

4. Once started, your session should look like this -- this is SPSS running in a virtual Microsoft Windows server:
Save Your Work

Be sure any work that you want saved in one of the two storage options described below! (Home Folder or Google Drive)
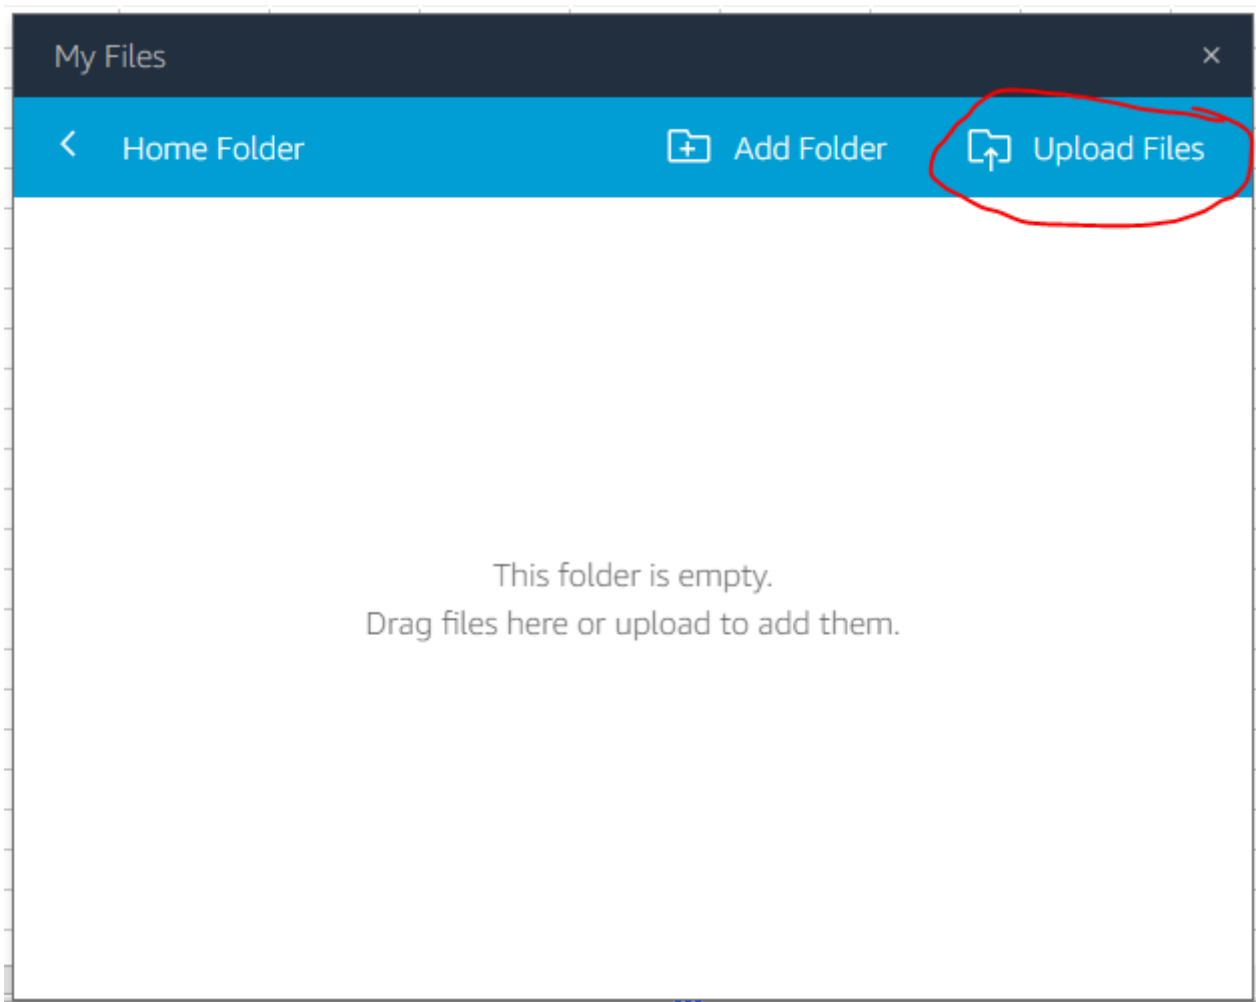

Storage - Home Folder

When saving and opening files, you can use the special "**Home Folder**". This area persists across all AppStream sessions.

If you need to upload to the Home Folder from your own computer:

Storage - Google Drive

You can also link your AppStream sessions to your URI Google Drive.

- Perform the one-time linking -- after clicking Add Storage, select Google Drive, and then login with your URI Google credentials.

- Once linked, the Google Drive option will appear for opening and saving files. Future AppStream sessions will not need to re-link to Google Drive.

- Getting files in and out of Google Drive continues to be like how you would normally use Google Drive independently of SPSS AppStream -- browse to drive.google.com and use your URI credentials.

Ending Your Session

There are no special directions for ending your SPSS AppStream session. You can just close your browser window / tab.

If you are using a public / shared / lab computer be sure to log yourself out of any accounts!
